Won't Let You Drown

A Tabbush

I see dark clouds that grow
Across the horizon my friend
As the storm rocks our boat
Know that I'm here til it's end

Hold on tight, we're in for a stormy night
Come take my hand, til we reach dry land
Know that I won't let you drown
Know that I won't let you drown

Together we look
Into the eye of the storm
And with hope in our hearts
The sun will arise with the dawn
